

GS UK LTD

www.gs-ukdirect.com

GS UK are proud to offer our stunning range of Gunold embroidery threads, backings and supplies.

Our Sulky embroidery threads are the only threads 100% guaranteed to be made with Enka Rayon, the worlds number one Viscose Rayon, famed for its strength and vibrancy of colour.

When quality and performance are a major concern the only thread to choose is Sulky Enka Rayon, which is guaranteed 100% European manufactured and is certified to Oko-Tex Standard 100.

Sulky 40 100% Rayon

Sulky is made with Enka Rayon the world's number one Viscose Rayon

Poly 60 Thread

1500m Mini King

1.37

POLY 60 is a thin yet extremely durable thread that is especially recommended for small lettering and intricate designs.

A 60's needle is recommended with this thread.

POLY FIRE

POLY FIRE is a fire retardant thread. During the spinning process, a special coating is applied to the polyester fibre, preventing the thread from catching fire easily. Neither the embroidery process nor wearing or washing will reduce the flame-resistant property of POLY FIRE.

Cop / Mini Kings 10+

All Colours 3.10

Technical Information	
Washing	Tested according to
Up to 95°C	EN ISO 15025/EN 533 Index 3 EN ISO 6941

Cotty 30 100% Cotton

Cotty 30 is 100% cotton thread. It is the traditional choice for embroidery and quilting. Ideal for embroidering on knitwear or self-colouration designs, e.g. blue embroidery on blue denim. Cotton is a natural thread giving a soft, matte look.

Clear 4.15

Smoke 4.15

GLITTER - Metallic Foil Thread

Glitter is a glittery foil thread. It produces fascinating glittery effects resulting in stunning embroideries. Like a hologram the cut, untwisted yarn surface refracts the light adding brilliance to any embroidery design.

1000m Each

Solid Colours 4.65

Multi Colours 6.05

Mety 5/2 & 7/2

Add eye-catching effects to your embroidery. Mety thread combines a nylon core, a polyester surround and a metal coating. This makes it ideal for highlights and fashion.

The reflective quality of this thread makes it ideal to give badges and embroidery designs a metallic quality.

Fluorescent threads, however, can also create fascinating effects on sportswear or promotional items – for striking logos that are hard to be ignored!

Gunold Selection Box

Per Box

Poly Selection Box
Sulky Selection Box

33.75

44.50

This practical Selection box contains 27 of the most popular plain colours taken from the colour shade card. The Mini King cones are 1,000m.

Bobby Maxi 100

Extra large economy bobbin thread. 100% Polyester spun thread. Washable to 95°C.

Colour	Length	Price each
White	1 x 15000m	7.55
Black	1 x 15000m	8.75

Economy 100

100% Spun Polyester. Economy 100 is 100% polyester and is part of our economy range. It is ideally used with our Poly threads.

Colour	Length	Price each
White	1 x 10000m	5.50

Bobby Syn

100% Polyester. Our Polyester underthreads come in three sizes:

100 - A universal underthread suitable for all embroidery.

120 - A thin and strong multi-purpose underthread.

130 - The finest thread with the longest run time.

Colour	Size	Length	Price each
White	100	1 x 10000m	7.65
Black	100	1 x 10000m	8.85
White	120	1 x 10000m	6.95
Black	120	1 x 10000m	8.00
White	130	1 x 10000m	5.45
Black	130	1 x 10000m	7.15

Magna-Glide Pre-Wound Bobbins

Magnetic core embroidery bobbins. The only bobbin that is specifically designed to sew without tension variation throughout the entire bobbin.

Colour	Amount & Length	Style	Price
White	100 Bobbins x 120m	L	19.95
Black	100 Bobbins x 115m	L	21.95
White	100 Bobbins x 210m	M	28.75

The magnetic core, combined with advanced EB "cross-link" technology optimises dynamic thread delivery to create consistent tension from beginning to end of each bobbin.

Style 'L' fit most machines with standard hooks such as Tajima/Barudan/ZSK/SWF/the Brother BES 415 & the Brother PR Range. **Style 'M'** fits all other Brother and all other machines with large capacity hooks.

Pre-Wound Bobbins

100% Polyester. GS UK's exclusive pre-wound bobbins increase output. The additional meterage means less down time due to the reduced bobbin changes. The consistent length of each bobbin allows all bobbins to be changed at the same time increasing production.

Colour	Amount & Length	Style	Price
White	144 Bobbins x 125m	L	14.75
White	144 Bobbins x 230m	M	24.25

Pre-Wound Bobbins for Brother PR Embroidery Machines

Bobbins with core and side discs. These bobbins are perfect for the Brother PR & home embroidery machines.

Colour	Amount & Length	Style	Price
White	144 Bobbins x 120m	L	18.45

Waterproof your Embroidery - Thermoseal

Apply THERMOSEAL to the back of your embroidery to prevent water and moisture penetrating the fabric through the tiny embroidery needle punctures.

Product	Roll Size	Price
Thermoseal	25cm x 10m	62.95
	50cm x 10m	123.95

Thermofilm

THERMOFILM is a heat-removable film that can easily be torn away after embroidery. Small residues can completely be removed with an iron.

Product	Roll Size	Price
Thermofilm 30μ	100cm x 300m	50.95
	50cm x 25m	4.75

Solvay Water Soluble Film

We recommend using SOLVY as an aid to enhance the definition and detail of embroidery on problematic material.

SOLVY prevents the stitches from disappearing into the fabric.

With SOLVY the stitches sit on the surface of the fabric. Ideally for use on towelling, knitwear etc. Dissolves on contact with water or steam.

Product	5m Roll	100m Roll
Solvay Roll Width x 100cm	4.50	69.00
Solvay Narrow Roll Width x 20cm		16.50
New Solvy Roll Width x 100cm (without embossing)	2.65	40.00

Soluble Stabilizer - Solvy Fabric

Ideal for producing badges, lace embroidery or any garment where you need to remove all the backing after embroidery. This is done easily by dampening backing after sewing.

Product	Roll Size	Price
Solvly Fabric	200m x 50cm	126.95
	25m x 50cm	20.95

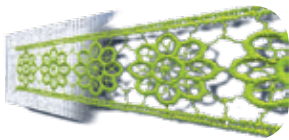

Solvly 80

The special foil SOLVLY FILM 80 is firmly hooped in an embroidery frame for direct embroidery, without using fabric or any additional stabilizers, making it ideal for badges.

Product	Roll Size	Price
Solvly 80 Ultra	100m x 100cm	145.00
	20m x 100cm	39.50

Thermogaze

A heat sensitive viscose material which is removed by heat after sewing, leaving only the embroidery design. Roll Width 80cm.

Colour	Roll Size	Price
White	5m	9.00
White	100m	148.00

Woven Badge Stiffener

Permanent iron-on backing to stiffen badges.

Colour	Width	Per Metre
Black	90cm	2.75
White	90cm	2.20

Appliqué Backings

Standard (Roll Size: 200m x 100cm) A blue glue backing used as an adhesive for standard fabrics.

Stabilizer Tissue (Roll Size: 200m x 100cm) A white double sided tissue acting as a stabiliser to prevent distortion of problem fabrics.

Heat Adhesive with protective release paper (Opaque Roll Size: 100m x 72cm). An industrial adhesive used to attach embroidered items and badges to garments.

Type	5 Metres	Per Roll
Standard (Blue)		370.00
Stabilizer Tissue (White)		340.00
Heat adhesive with protective release paper (Opaque)	13.95	230.00

Puffy Foam / 3D Foam

An Eva foam used for giving a 3D raised effect to embroidery designs. Sheets are 40cm x 30cm (3mm thick). Available in Black and White. An exact colour match is not required as the foam is covered with the stitches.

Product	Per Pack
Puffy Foam Per Sheet	1.10
Puffy Foam Pack of 10 Sheets in a Single Colour	7.25

Thermofoil

A heat activated film used to attach embroidered items to garments without sewing.

Product		5m Roll	100m Roll
BSN H	Width 52cm	12.00	190.00
BSN J	Width 52cm	13.25	215.00
BSN H	Narrow 21cm		71.00
BSN J	Narrow 21cm		83.00

BSN H: Medium weight for household garments washable to 40°C

BSN J: Medium weight for industrial garments washable to 95°C

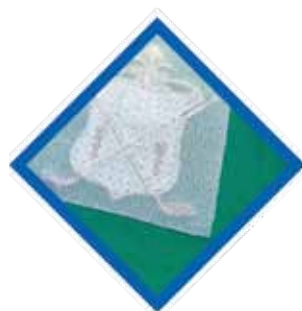

Thermofix - Adhesive Fibres for Permanent Bonding

Adhesive fibres for permanent bonding of appliques, patches and emblems.

Product		Per Roll
25m x 40cm		29.00
100m x 80cm		180.00

Stick Protect

Beautiful embroideries don't have to irritate your skin if they're covered with the soft protective fusible STICK-PROTECT!

Especially in fine, soft materials seams and embroideries can be irritating to the skin. STICK-PROTECT is ironed on the wrong fabric side to completely cover the finished embroidery design – durable, even after frequent washing. Great for children's wear.

Product		Per Roll
Stick Protect 25m x 50cm	White	21.95
	Black	22.95

KK Adhesive Spray

A temporary adhesive spray for bonding garments to framed backing materials. Ideal for appliqué. Avoids creasing and damage due to framing.

Should be used with Angus Silicone Spray.

Product	Size	Per Can
KK100	500ml	6.25
KK100 Economy	500ml	4.45
KK2000	100ml	5.90

Angus Silicone Spray

Prevents Gumming.

Angus Silicone spray is specifically designed to prevent 'gumming' of needles and hooks when using appliques with adhesive backings.

Product	Per Can
Angus Silicone Spray (400ml)	5.55

Frames

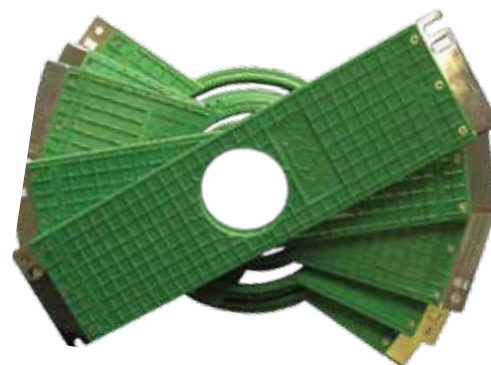

Patented Allied Grid-Lock™ Frames

Allied Gridlock Plastic Tubular Frames are truly innovative, highly engineered products that have been patented.

Engineered Non-Slippery surface texture: AGL frames are uniquely engineered with a non-slippery surface texture, enabling tighter 'locking' grip of the garment. AGL frames provide highly consistent tension across the hooped area, yielding better embroidery results.

Horizontal and Vertical Grid Lines - Customers can use the horizontal and vertical grid lines on the arms of round frames as an 'instant guide' for straight & square hooping of an article, every time.

Embroidery Frames: Our frames are suitable for *Brother*, *Tajima* and *Toyota* Embroidery Machines. Frames for other manufacturers are available upon request.
