# Threads

## POLY - 100% POLYESTER

The Poly range is 100% polyester enabling it to withstand bleaching and high wash temperatures. This makes Poly thread ideal for workwear, industrial washable clothing, denim, chef whites etc.

Technical Information			
Washing	Dry Cleaning	Bleachable	Light Fast
Up to 95°C	Yes	Yes	Yes

## POLY 60 THREAD

Poly 60 weight thread is a thin yet extremely durable 100% polyester thread that is especially recommended for monogramming and intricate designs. Ideal for embroideries requiring finer detail or small text of 3mm high and above. Poly 60 has the same characteristics as Poly 40, it is colour fast to chlorine and may be washed up to 95°C.

**A 60's needle is recommended with this thread.**

### 1500m Mini King

## POLY FIRE

Poly Fire is a fire retardant thread. During the spinning process a special coating is applied to the polyester fibre, preventing the thread from catching fire easily. Neither the embroidery process nor wearing or washing will reduce the flame-resistant property of Poly Fire.

Technical Information	
Washing	Tested according to
Up to 95°C	EN ISO 15025/EN 533 Index 3 EN ISO 6941

### 1000m Mini King

## INVISIBLE

Invisible (formerly Mono) can be used to create a stunning transparent look, for an exciting new embroidery effect. Mono may also be used for invisible seams and to fix sequins. It is available in Clear and Smoke.

### 500m Cone

Clear  
Smoke

## COTTY 30 - 100% COTTON

Cotty 30 is 100% cotton thread. It is the traditional choice for embroidery and quilting. Ideal for embroidering on knitwear or self-colouration designs, e.g. blue embroidery on blue denim. Cotton is a natural thread giving a soft, matte look.

Washing	Dry Cleaning	Bleachable	Light Fast
Up to 95°C	Yes	No	Yes

## COTTY 30 BIO - 100% COTTON

The cultivation, twisting and dying process of the cotton used for COTTY 30 BIO is GOTS certified. Post-processing (winding of the final make-up and application of a lubricant) comply with the requirements and limit values specified by GOTS for Ingredients and Accessories.

### 500m Mini King

White  
Colours

## POLY FLASH - 100% POLYESTER

Poly Flash combines the properties and look of polyester, viscose and metal in a single thread. The look of Poly Flash is like 'hammered metal', and gives a 'vintage style' appearance.

### 1000m Mini King

All Colours

## POLY SPARKLE

Poly Sparkle (formerly Poly Star) is made from Polyester thread which is twisted with a metallic thread. As a 30's weight thread, designs may need to contain slightly less stitches.

### 1000m Mini King

All Colours

## METY 5/2 & 7/2

Add eye-catching effects to your embroidery. Mety thread combines a nylon core, a polyester surround and a metal coating. This makes it ideal for highlights and fashion. The reflective quality of this thread makes it ideal to give badges and embroidery designs a metallic quality.

Technical Information			
Washing	Dry Cleaning	Bleachable	Light Fast
Up to 60°C	Yes	No	Yes

## GLITTER - METALLIC FOIL THREAD

Glitter is a glittery foil thread. It produces fascinating glittery effects resulting in stunning embroideries. Like a hologram the cut, untwisted yarn surface refracts the light adding brilliance to any embroidery design.

### 6000m Cone

Solid Colours

## REFLEX CRY

Retro-reflection is the magic word. Retro-reflection occurs when a reflective material returns the impinging radiation to the direction of the radiation source, largely independent of the direction of the reflector. This is particularly the case in the dark, therefore ideal for security and protecting people. Thousands of microscopic glass beads embedded in a polymer coating, encase the polyamide core and as a result Reflex Cry reflects light in the dark.

### 500m Mini King

Reflex Cry Mini - 200 micron

## GUNOLD SELECTION BOX

This practical Selection box contains 27 of the most popular plain colours taken from the colour shade card. The Mini Kings are 1000m. Selection boxes are available for the Polyester thread, Sulky Rayon thread and also the Poly 60 thread range.

### 27 x 1000m Mini Kings

## FILAINE - 100% ACRYLIC

Filaine is a natural looking fibre that gives the thread a wool look. It is ideal for use on knitwear giving a hand embroidered feel.

### Technical Information

Washing	Dry Cleaning	Bleachable	Light Fast
Up to 30°C	Yes	No	Yes

### 1000m Cone

All Colours

## GLOWY - FLUORESCENT THREAD

Natural and artificial light is stored in these special threads and released in the dark. Their long lasting luminosity is ideal for logos, letterings or motifs used in the security service industries that need to be visible particularly at night.

Fluorescent threads can also be used to create fascinating effects on sportswear or promotional items – for striking logos that are hard to be ignored!

## ESSENTIAL EMBROIDERY STARTER PACK

When you are new to embroidery it can be difficult knowing what consumables you need, so Gunold have created the Essential Embroidery Starter Pack. It contains everyday products including Polyester threads, metallic thread, sample spools, underthread, pre-wound bobbins, a selection of backings, Solvy, speciality fabrics, scissors, shade cards and product information.

### Product

Essential Embroidery Starter Pack

# Underthreads

## BOBBY MAXI 100 - BOBBIN THREAD

Extra large economy bobbin thread.  
100% Polyester spun thread. Washable to 95°C.  
A fine and smooth, tear resistant bobbin thread,  
the ideal complement for high-quality upper threads  
to produce outstanding embroideries.

Colour	Length
White	1 x 15000m
Black	1 x 15000m

## MAGNA-GLIDE PRE-WOUND BOBBINS

Magnetic core embroidery bobbins. The only bobbin that is specifically designed to sew without tension variation throughout the entire bobbin.

The magnetic core, combined with advanced EB "cross-link" technology optimises dynamic thread delivery to create consistent tension from beginning to end of each bobbin.

Colour	Amount & Length	Style
White	100 Bobbins x 120m	L
Black	100 Bobbins x 115m	L
White	100 Bobbins x 210m	M

**Style 'L'** – Fits most machines with standard hooks such as Tajima/Barudan/ZSK/SWF/Brother BES 415 & Brother PR range.

**Style 'M'** – Fits all other Brother machines and all other machines with large capacity hooks.

## PRE-WOUND BOBBINS FOR BROTHER PR EMBROIDERY MACHINES

Bobbins with core and side discs. These bobbins are suitable for:  
Industrial embroidery machines  
Brother PR embroidery machines  
Home embroidery machines

Colour	Amount & Length	Style
White	144 Bobbins x 122m	L
Black	144 Bobbins x 113m	L

## ECONOMY 100 - BOBBIN THREAD

100% Spun Polyester. Economy 100 is 100% polyester and is part of our economy range. It is ideal to use with our Poly threads.

Colour	Length
White	1 x 10000m

## BOBBY SYN

100% Polyester, the Bobby Syn underthreads come in two sizes:

100 - A universal underthread suitable for all embroidery.

130 - The finest thread with the longest run time.

Colour	Size	Length
White	100	1 x 15000m
Black	100	1 x 15000m
White	130	1 x 15000m
Black	130	1 x 15000m

## PRE-WOUND BOBBINS

100% Polyester. GS UK's exclusive pre-wound bobbins increase output. The additional meterage means less down time due to the reduced bobbin changes. The consistent length of each bobbin allows all bobbins to be changed at the same time increasing production.

**Style L** suitable for use with the Brother PR machines.

Colour	Amount & Length	Style
White	144 Bobbins x 230m	M
White	144 Bobbins x 141m	L

# Embroidery Backing Materials

## STIFFY RANGE - EASY TEAR

1860NC	White	Medium 60gm	100m x 35cm
186025M	White	Medium 50gm	25m x 52cm
1980NC	White	Heavy 75gm	100m x 21cm

## CUT-AWAY

Type	Colour	Weight	Size
TEXTI 1970	White	70gm	100m x 105cm
TEXTI 197025M	White	70gm	25m x 52cm
TEXTI 1970	White	70gm	20cm x 20cm (500 Sheets)
1950	White	80gm	100m x 90cm
1950	Black	80gm	100m x 90cm

## CUT-AWAY - SOFT 'N' SHEER

Soft 'n' Sheer 2040 is a lightweight 'No Show', Sheer cut-away backing. Best used on lightweight knits and sheer fabrics. Soft 'n' Sheer minimises backing shadows through light-coloured garments.

Type	Colour	Weight	Size
2040	White	50gm	25m x 50cm
2040	Black	50gm	25m x 50cm
2040	White	50gm	100m x 100cm
2040	White	50gm	200m x 100cm

## CAP BACKING

Quality backing for cap embroidery. Ideal for 270° cap embroidery.

Type	Colour	Weight	Size
1995	White	95gm	100m x 105cm
1995NC	White	95gm	100m x 10cm

## THERMOFILM

Thermofilm is a heat-removable film that can easily be torn away after embroidery. Small residues can completely be removed with an iron.

Product	Roll Size
Thermofilm 30µ	25m x 50cm

## PRE-CUT SELECTION

### Medium 1640 Tear-away

Colour	Quantity	Size
White	1000	12cm x 12cm
White	1000	15cm x 15cm
White	1000	20cm x 20cm
White	500	25cm x 25cm

### Light 2040 Cut-away

Colour	Quantity	Size
White	250	20cm x 20cm

## CUSTOM CUT ROLLS

We offer custom cut rolls, which can be cut to the customers own dimensions. The cost of the roll plus a cutting charge would apply.

100 metre roll – cut to clients own dimensions.

200 metre roll cut to clients own dimensions.

## THERMOSEAL - WATERPROOF YOUR EMBROIDERY

Apply Thermoseal to the back of your embroidery to prevent water and moisture penetrating the fabric through the tiny embroidery needle punctures.

Product	Roll Size
Thermoseal	25cm x 10m
Thermoseal	50cm x 10m

## FILMOPLAST (BLUE GRID)

Self adhesive non-woven backing. Various materials can simply be laid out on the Filmoplast and embroidered without the need for framing.

Colour	Width
White	50cm
Black	50cm
White	100cm
White	25cm

## FILMOPLAST STRONG (GREEN GRID)

Colour	Width
White	25cm
White	50cm

## PUFFY FOAM - 3D FOAM

An Eva foam used for giving a 3D raised effect to embroidery designs. Sheets are 40cm x 30cm (3mm thick). Available in Black and White. An exact colour match is not required as the foam is covered with the stitches. PE10 Foam is more dense and ideal for Caps.

Product
Puffy PE20 Foam - Per Sheet
Puffy PE20 Foam - Pack of 10 Sheets in a Single Colour
Puffy PE10 Foam - Pack of 10 Sheets in a Single Colour (More Dense)

## SOLVY - WATER SOLUBLE FILM

Recommended to enhance the definition & detail of embroidery on problematic material.

Solvly prevents the stitches from disappearing into the fabric. With Solvly the stitches sit on the surface of the fabric.

Ideal for use on towelling, knitwear etc. Solvly dissolves on contact with water or steam.

Product	Roll Size
Solvly (without embossing)	100m x 100cm
	5m x 100cm
	25m x 50cm

## SOLVY FABRIC - SOLUBLE STABILIZER

Ideal for producing badges, lace embroidery or any garment where you need to remove all the backing after embroidery. This is done easily by dampening the backing after sewing.

Product	Roll Size
Solvly Fabric	200m x 50cm
	25m x 50cm

## SOLVY 80

The special foil Solvly Film 80 is firmly hooped in an embroidery frame for direct embroidery, without using fabric or any additional stabilizers.

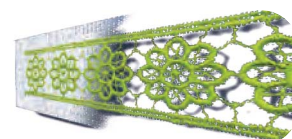

The result is an incredibly soft, flexible piece of embroidery. The finished design is then simply torn out. Ideal for producing badges and even cutwork embroideries like English or Richelieu embroidery as this special water-soluble product completely dissolves in water.

Product	Roll Size
Solvly 80 Ultra	100m x 100cm
	20m x 100cm

## THERMOGAZE

Thermogaze is a heat-sensitive gauze that is used as an embroidery backing and completely disintegrates during ironing. The result is beautiful, filigree-like embroideries - without any residue!

Product	Roll Size
Thermogaze	100m x 80cm
	5m x 80cm

## WOVEN BADGE STIFFENER

Permanent iron-on backing to stiffen badges.

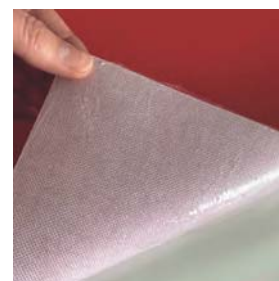

Product	Roll Width
Black	90cm
White	90cm

# Specialist Backings & Adhesives

## KK FILM

Appliquing is a piece of cake with KK FILM, the double-sided, self-adhesive film fixes the fabric to be appliquéd without ironing. Coat the appliqué fabric with KK FILM, cut out the desired shape, stick it onto the base fabric, embroider – and you're done! This is a quick and easy way to produce appliques with clean edges – no cutting out by hand. The self-adhesive film can also be heat activated – simply transfer the film to the appliqué fabric and activate it with an iron or heat press. This increases the adhesive strength and effect of KK FILM.

Product	Roll Size
KK Film	25m x 50cm
KK Film	25m x 100cm

## APPLIQUÉ BACKINGS

### Temporary Adhesive

A glue backing used as a temporary adhesive, ideal for positioning appliques.

### Permanent Heat Adhesive with protective release paper

An industrial adhesive used to attach embroidered items and badges to garments.

Product	Roll Size
Temporary Adhesive	200m x 100cm
Permanent Heat Adhesive (with protective release paper)	200m x 100cm
Permanent Heat Adhesive (with protective release paper)	5m x 72cm

## THERMOFOIL - BSN

Thermofoil BSN permanently bonds patches, badges and emblems - without sewing! After embroidery, BSN is ironed onto the entire reverse side of the emblem. This makes every appliqué extremely durable, even edges and borders will not come off. BSN is available in two versions:

### BSN H

Medium weight for household garments washable to 40°C. Applied with an Iron.

### BSN I (formerly J)

Medium weight for industrial garments washable to 60°C. Applied with a Heat Press.

Product	Roll Size
BSN H	5m x 37.5cm
BSN H	25m x 37.5cm
BSN H	100m x 37.5cm
BSN I	5m x 37.5cm
BSN I	25m x 37.5cm
BSN I	100m x 37.5cm

## THERMOFIX - ADHESIVE FIBRES FOR PERMANENT BONDING

Cutting out, ironing-on – that's all there is to using Thermofix. It is easy and fast to affix embroidery designs onto jackets, shirts and fabrics permanently – even after frequent washing. Thermofix is just like a nonwoven that consists of adhesive fibres. It is ironed onto the finished embroidery design after the embroidery process. Then the emblem is placed onto the desired spot of your fabric and has to be permanently fixed either with a household iron or a heat press. It is also the perfect solution for very small and tricky areas where fixation by machine is simply impossible. Also great for fusing edges and for seaming!

## KK ADHESIVE SPRAY

A temporary adhesive spray for bonding garments to framed backing materials. Ideal for appliqué. Avoids creasing and damage due to framing. Should be used with Angus Silicone Spray.

Product	Size
KK100	500ml
KK100 Economy	500ml

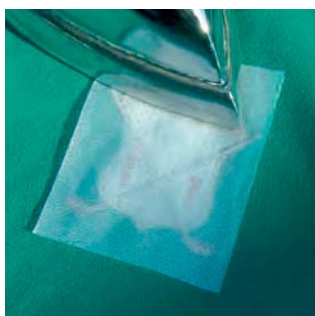

Product	Roll Size
Thermofix	100m x 50cm
Thermofix	25m x 50cm

## STICK PROTECT

Beautiful embroideries don't have to irritate your skin, if they are covered with Stick Protect, a soft, protective, fusible gauze. In fine, soft materials, seams and embroideries can be irritating to the skin. Stick Protect is ironed on the wrong fabric side to completely cover the finished embroidery design – durable even after frequent washing. Great for babywear & childrenswear.

Product	Roll Size
Stick Protect White	25m x 50cm
Stick Protect Black	25m x 50cm

## ANGUS SILICONE SPRAY

Angus Silicone spray is specifically designed to prevent 'gumming' of needles and hooks when using appliqués with adhesive backings.

Product	Size
Angus Silicone Spray	400ml

# Appliqué Fabrics

## BADGE TWILL

An economy range of durable Badge Twill with a matte finish. 65% Polyester, 35% Cotton. Machine washable up to 50°C. Dry Cleanable. Note - Orange BT062 to be discontinued when current stocks have sold out.

### Approx. Roll Width

150cm

Available per metre.

## SPORTS TWILL

Our Sports range of durable appliqué fabric with a slight sheen in 13 striking colours. Heat adhesive on reverse. 100% Polyester. Machine washable up to 50°C, Dry Cleanable.

### Approx. Roll Width

125cm

Available per metre.

## FELT

A high quality Badge Felt. 100% Polyester. Machine Washable up to 60°C. Dry Cleanable. More colours available, please call for details.

### Approx. Roll Width

90cm

Available per metre.

## STITCH FABRIC

Use Stitch Fabric to effectively simulate stitches over large areas. Stitch Fabric can be cut at different angles for varying effect. Machine washable to 40°C. 100% Polyester.

### Approx. Roll Width

75cm

Available per metre.

# Embroidery Accessories

## TENSION GAUGE

The TOWA bobbin case tension gauge allows easy adjustment to the bobbin tension by giving a numerical range on how tight or loose the tension is in the bobbin case. For use with 'L' size bobbins. Bobbin case NOT included.

Product
TOWA Tension Gauge

## SCISSORS, TWEEZERS, RIPPERS & SNIPPERS

High precision scissors perfect for embroidery enthusiasts and professionals.

Product	Size
Curved Scissors	3.5"
Curved Scissors	4.0"
Flat Embroidery Scissors	5.0"
Appliqué Scissors	6.0"
Double Curve Scissors	6.0"
Angled Tweezers	5.0"
Long Snippers

## ORGAN NEEDLES

Organ is one of the most famous manufacturers of embroidery needles in the world. Organ have been manufacturing needles since 1939.

The Organ (Domestic) needles are suitable for the Brother PR embroidery machines.

Product	in Box (100 needles)
Organ (Industrial) DB+K5 - NY Available in sizes: 90/14 75/11 70/10 60/8	
Organ (Domestic - Flat Back) 10130/750H Available in sizes: 80/12 75/11 60/8 SES	

## ORGAN METALLIC NEEDLES

The DBx7ST has a larger eye that allows the metallic thread to move freely through the needle.

Product	in Box (100 needles)
Organ DBx7ST 75/11 Medium Ball Point (SES)	

## GROZ-BECKERT NEEDLES

Groz-Beckert needles offer a greater resistance to needle deflection and the possibility of using a finer size needle to reduce fabric damage.

Product	in Box (100 needles)
GB DB+K5 Available in sizes: 60/8 75/11 70/10	

## SCHMETZ NEEDLES

Schmetz - manufacturers of high quality needles for single-head and multi-head embroidery machines.

Product	in Box (100 needles)
Schmetz DB+K5 SES Available in sizes: 80/12 75/11 70/10	

OIL PEN, OIL AEROSOL

**Oil Aerosol** - Stainless sewing machine oil in a 500ml aerosol.

**Gunold Oil Pen** - for lubricating those hard to reach parts of your embroidery machine. Needle bar, thread take-up lever or hook need to be lubricated regularly. The Oil Pen needle allows you to pinpoint the spot you want to lubricate.

Product
Oil Aerosol (500ml)
Gunold Oil Pen (12ml)

REPAIR TOOL KIT

This indispensable repair & tool kit includes the following 5 items in a zipped pouch:

- Narrow blade scissors
- Snipper
- Seam ripper
- Screwdriver
- Tweezers

Product
Tool Kit 1

BIRDS NEST TOOL KIT

Tool Kit 2 includes a sharp surgeon's knife with a long, narrow shaft and a thread hook, for removing tangled threads. Length: 26cm Width: 7cm

Product
Tool Kit 2

Frames

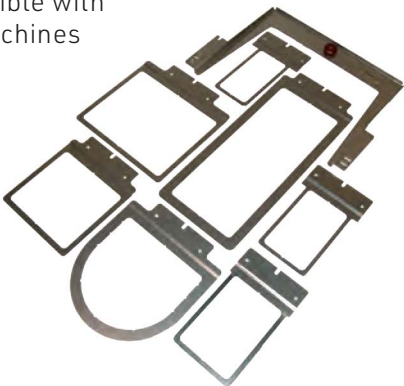

FAST FRAMES

Fast Frames allow you to embroider difficult to frame items. Filmoplast is placed on the underside of the fast frame with the adhesive exposed within the sewing area. Press your garment onto the filmoplast and it will be held in place whilst being embroidered.

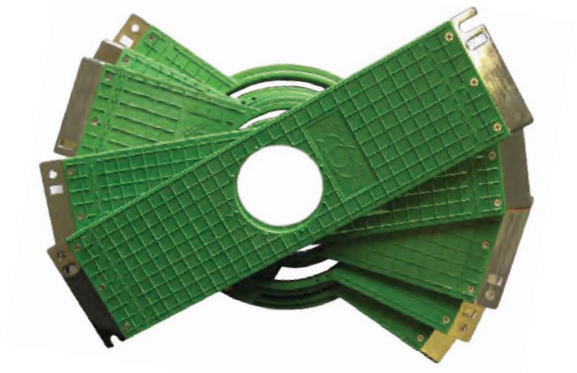

7 in 1 Fast Frame Set
Brother PR Fast Frame Set

7 in 1 Fast Frame

Uses include embroidering on to sweat band area of caps, back, sides, bucket caps, collar tips, cuffs of sleeves, dog collars, gym bag centre flaps, etc. A Fast Frame Set compatible with the Brother PR Machines is also available.

FRAMES

Patented Allied Grid-Lock™ Frames

Allied Gridlock Plastic Tubular Frames are truly innovative, highly engineered products that have been patented.

**Engineered Non-Slippery Surface Texture** - AGL frames are uniquely engineered with a non-slippery surface texture, enabling tighter 'locking' grip of the garment. AGL frames provide highly consistent tension across the hooped area, yielding better embroidery results.

**Horizontal & Vertical Grid Lines** - Customers can use the horizontal and vertical grid lines on the arms of round frames as an 'instant guide' for straight & square hooping of an article, every time.

#### Embroidery Frames -

Our frames are suitable for Brother, Tajima and Toyota Embroidery Machines. Frames for other manufacturers are available upon request.

Product	Size
<b>Tubular Round Frames with Arms</b>	
GRIDLOCKTFA07	7cm
GRIDLOCKTFA09	9cm
GRIDLOCKTFA12	12cm
GRIDLOCKTFA15	15cm
GRIDLOCKTFA18	18cm
GRIDLOCKTFA21	21cm
<b>Tubular Square Frames with Arms</b>	
GLOCKSQUARE14x15	14cm x 15cm
GLOCKSQUARE19x20	19cm x 20cm
GLOCKSQUARE24x24	24cm x 24cm
GLOCKSQUARE30x24	30cm x 24cm
GLOCKSQUARE30x30	30cm x 30cm

## Heat Presses

#### MERLIN PRO HEAT PRESS

The auto open 40cm x 50cm Merlin Pro heat press is a high pressure clamshell style heat press that is easy to use and can handle heavy duty and frequent use. Perfect for anyone interested in starting a print shop or expanding their custom apparel business.

**Merlin Pro**

# Industrial Embroidery Machines

#### MERLIN PRO RANGE

The Merlin Pro range of industrial embroidery machines are available in various sizes to suit the requirements of any business. We have a highly experienced team of embroidery machine engineers that service the whole of the UK and Ireland. All the Merlin Pro machines include installation, delivery & training.

##### Merlin Pro RS7-1501

A versatile 15 needle, single head embroidery machine.

##### Merlin Pro RS10-1502

A powerful, 15 needle, twin head embroidery machine.

##### Merlin Pro RS10-1504

A full production, 15 needle, 4 head embroidery machine.

##### Merlin Pro RS10-1506

A high level full production 15 needle, six head embroidery machine.

#### MERLIN 101 EMBROIDERY MACHINE

With 10 needles, heavy duty stand and a cap attachment, this versatile single head entry-level embroidery machine is perfect for hobbyists, start-ups or custom apparel businesses expanding into embroidery.

## ETHOS EMBROIDERY SOFTWARE

The Ethos suite of Embroidery & Cutting Software has been in development for over 25+ years, when CadCam Technology Limited embarked upon the first of many innovative products designed for the Textiles industry. During this time our aim has been to create a range of software that is easy to use, yet extremely powerful.

The flexibility of the Ethos embroidery software enables it to be tailored to suit the individual needs of a company. For details visit **[www.aps-ethos.com](http://www.aps-ethos.com)**
